

YAGNIK VARU

Backend Node.js Developer | Ahmedabad, India | Open to Remote & On-site | Immediate Joiner
yagnik.varu.dev@gmail.com | +91-8734901179 | linkedin.com/in/YOUR-HANDLE | github.com/YOUR-HANDLE

PROFESSIONAL SUMMARY

Backend Node.js Developer with 2+ years of experience building scalable, multi-tenant applications with Node.js, NestJS, TypeScript, PostgreSQL, MongoDB, and RabbitMQ. Delivered REST APIs, microservices, event-driven systems, and secure authentication (JWT, OAuth2, SAML SSO, RBAC) serving 10,000+ users across 50+ organizations. Experienced in AWS, Docker, LLM integrations (OpenAI, Gemini), and n8n workflow automation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Backend: Node.js, NestJS, Express.js, REST APIs, Microservices, Event-Driven Architecture; Next.js, React (basic)

Databases: PostgreSQL, MongoDB, Redis, Prisma ORM

Messaging & Queues: RabbitMQ, BullMQ, Dead-Letter Queues (DLQ), Job Queues

Cloud & DevOps: AWS (S3, SES, CloudFront), Docker, Docker Compose, CI/CD, Git

Security & Auth: JWT, OAuth2, SAML SSO, RBAC, 2FA, Multi-Tenant Isolation

Automation & AI: n8n Workflow Automation, Webhooks, API Integration, OpenAI API, Gemini API, Prompt Engineering, LLM Integration

PROFESSIONAL EXPERIENCE

Backend Engineer (Node.js) | Prime Apps Infotech, Ahmedabad, India

Nov 2023 – Present

Joined as an intern; promoted to full-time engineer within 6 months.

LAC Platform — Multi-Tenant CRM & Compliance | Node.js, Next.js, TypeScript, AWS

- Engineered a multi-tenant CRM and document platform serving 50+ organizations and 10,000+ users, using OwnCloud WebDAV and S3 presigned URLs for secure file workflows.
- Automated I-9/E-Verify identity verification and vendor-compliance workflows, integrating background checks, Stripe payments, SAML SSO, and RBAC.
- Designed an atomic Stripe license-purchase system with automatic refund-on-failure and per-item allocation, ensuring transactional integrity.
- Optimized vendor-data REST APIs by replacing heavy aggregations with an authorization-percentage tracking model, cutting redundant computation and response times.

LMS & LMS_API — Multi-Tenant Learning Management System | Node.js, NestJS, AWS

- Built a certificate-generation system with QR-code verification, S3 caching, and CloudFront CDN delivery for fast distribution at scale.
- Led a multi-tenant migration of attendance and access control with dynamic completion thresholds and zero data loss.
- Developed an AI course chatbot with the OpenAI API, injecting per-course context into prompts to answer learner questions.

Queue Manager — Event-Driven License Worker | NestJS, RabbitMQ

- Built a RabbitMQ consumer orchestrating async enrollment pipelines with exponential-backoff retries for fault tolerance.
- Implemented parent/child event tracking and NonRetryableError-based DLQ classification for observable error handling.

PROJECTS

TechReelAI — Automated Instagram Reel Pipeline | n8n, Gemini API, Docker

- Built end-to-end n8n workflows that automate Instagram tech-reel creation: topic research, LLM script generation, and structured response parsing.
- Designed prompt templates and a parser turning Gemini output into validated script objects; wrote script-quality test cases; self-hosted n8n via Docker Compose.

SpendSync — Collaborative Expense Platform | NestJS, Next.js, PostgreSQL, Prisma, BullMQ, Redis

- Built an expense-tracking platform with dual-token JWT authentication and overdraft protection; automated monthly ledger snapshots with idempotent BullMQ jobs.

EDUCATION

B.E. in Computer Engineering | LJ University, Ahmedabad

2021 – 2025

Languages: Gujarati (Native), Hindi (Native), English (Professional)
